

StarNet Wireless

"serving your wireless needs"

VoIP Hosted Phone Service

- No phone system or expensive telecom equipment required. StarNet VoIP is built on BroadSoft technology enabling a true hosted solution.
- StarNet Wireless is a telecommunications service company providing local and long distance phone service throughout the nation. This means that you will receive one bill from one company.
- Get rid of your old phone system and switch to StarNet VoIP for a complete hosted solution with virtually no startup cost. StarNet VoIP has the capability of servicing thousands of users just within one switch segment.
- Serve multiple business locations through one hosted solution to cut cost and heighten productivity.
- Have the capability of setting up a new user or branch office from anywhere on the internet through our secure application servers.
